School Vision and Mission

Faithfully following the teaching advocated by the Lord Jesus, our school has been upholding the mission of the founding group of the Chinese Sisters of the Immaculate Conception (C.I.C): “to go into all the world and preach the gospel to every creature” (Mark 16:15), in accordance with the spirit of Jesus’ love and the Catholic education philosophy, to make an effort to educate the next generation.

Our school is dedicated to providing holistic education to help them develop spiritually, morally, intellectually,

physically, socially and artistically, so that they can treasure life and get spiritually and intellectually prepared for their future.

We are also committed to assisting students to develop independent and critical thinking and cultivate a sense of civic and social awareness so that they can exercise correct value judgment on social issues. It is hoped that they can make a contribution to the society and serve all mankind, as well as understand Chinese culture and have a passion for life.

Five core values of Catholic Education

Truth, Justice, Love, Family, Life

Teacher Professional Training and Development

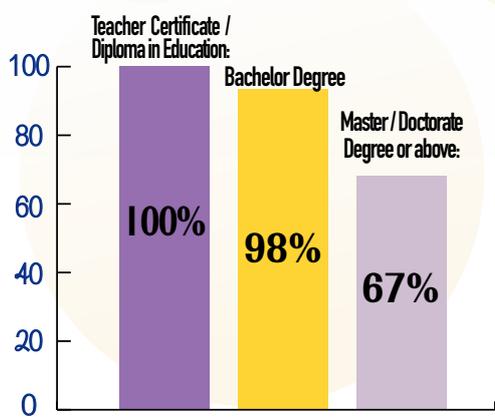

Having rich teaching experiences, our teachers are patient and warm-hearted. Different teams cooperate on a regular basis for lesson preparations, peer observations and sharing among teachers and schools. Our school also organizes different kinds of courses, workshops and programmes for teachers

both at school and outside the school to enable them to be familiar with the latest educational trends, classroom strategies and teaching effectiveness. Each year, there are at least three Staff Development Days for professional exchanges and collaboration.

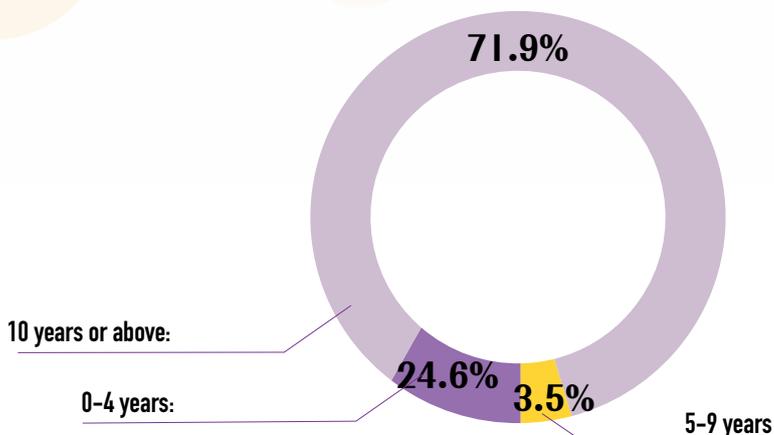

Total number of teachers in the school

57, including one Native-speaking English teacher

Elective subjects offered in senior secondary curriculum using EMI	Physics, Chemistry, Biology, Mathematics Extended Part Module 2
Other subjects in senior secondary curriculum	Physical Education, Religious Studies

*Subjects with extended learning activities (ELA) in English

Using English as the Medium of Instruction

To enhance students' English proficiency through increasing their exposure to authentic English outside the class, hence widening their horizons and strengthening their general knowledge, a number of English activities are regularly held, including English Debating Society, English Debate Team, English Musical for Actors and Stage Crew and so on. After-school tutorial classes are held to strengthen students' English, such as Springboard Enrichment classes for gifted English students. Also, our school has employed specialist tutors to boost the level of less able and hardworking students.

These different activities are to stimulate students' interest in learning English and enhance their confidence in using English.

This year, with the QEF grant, our school started to implement a two-year English Drama Programme. Besides staging a musical at the end of the school year and running different kinds of drama activities during the whole year, drama lessons are also provided in junior forms to explore students' potential in different areas and maximize their opportunities to use English in a more creative way.

Academic Achievement

As a result of our teachers' and students' hard work, students have performed satisfactorily in public examinations in recent years. In the Diploma of Secondary Education Examination, 12 subjects' pass percentage was on par with the territory's average and some subjects reached positive value-added scores of 7 to 8. With their outstanding academic achievement, our school graduates were presented with a number of prominent prizes, including Harvard Book Prize Scholarship, Link University Scholarship and Kwun Tong Outstanding Student Award in the Kwun Tong Outstanding Students Election. It is worth noting that one graduate was selected by the International Youth Programme, which nominated only 11 students to represent Hong Kong to go overseas for a cultural exchange, to visit Ireland. Furthermore, students'

performance in the Territory System Assessment has been encouraging, with the passing percentage of the three subjects, Chinese, English and Mathematics, on par with the territory's average.

Since 2013, our school has had a total of 200 graduates pursuing a Bachelor's degree at local universities, including The University of Hong Kong, The Chinese University of Hong Kong, The Hong Kong University of Science and Technology, The Hong Kong Polytechnic University and Hong Kong Baptist University. In the academic year of 2018-2021, over 90% of S6 graduates (three-year average) were successfully enrolled in a Bachelor's degree programme or an associate's degree / a Higher Diploma programme.

The comparison of the passing rates of each subject in these three years between our school and the territory

Self-directed Learning

Taking Initiative for all Stages of the Learning Process

Our school puts emphasis on cultivating students' self-learning habits. It is believed that through teaching students note-taking skills, helping them set learning goals and asking them to keep reflective learning journals, students can be more organized, self-disciplined and responsible for

their learning. They are required to reflect on and evaluate their learning experience so as to gain a clearer view of their learning progress. Hence, their learning effectiveness will be enhanced.

Remedial and Enhancement Classes for Junior Secondary Students

To cater for learner diversity, after-school remedial and enhancement classes in Chinese, English and Mathematics are run for junior secondary students with different learning

abilities. It is believed that students' confidence and learning motivation can be boosted.

Supplementary Classes for Senior Secondary Students

Our teachers have conducted supplementary classes for senior secondary students. S4 and S5 students are divided into groups according to their learning abilities and attend different supplementary classes after school from Tuesday to Thursday. To prepare S5 students for the

upcoming public examinations, our teachers will conduct supplementary classes for S5 students during the summer holiday. Afterwards, students will sit for the school pre-mock examinations at the end of the holiday.

Strengthening Summative Assessments

Aiming to cultivate students' regular study habits, our school conducts summative assessments on Monday mornings. It is hoped that this measure can provide our students with a rigorous learning atmosphere and improve their academic performance.

Implementing E-learning at School

Our school has implemented the "Bring Your Own Device Programme (BYOD)" to stimulate students' learning interest and increase learning effectiveness.

Reading for Unlimited FUN

The Reading Committee holds an activity named "Reading for Unlimited FUN". The aims of this reading programme are to cultivate reading culture in the school and promote extensive reading. Students are encouraged to read in groups and share their reading experiences and feelings by shooting short videos. They can come up with creative ideas and report their reflections on books in various ways, including storytelling, drama performances, experimental demonstrations and drawing comic strips. It is in the hope that students can find reading more interesting and enjoyable after taking part in this programme.

Religious Education

Our school puts emphasis on religious education, which aims to let students understand Jesus is our role model in practicing love and serving others. With the objective of nurturing students to have a positive attitude to cherish life and admire Jesus, all subjects have incorporated five core values of Catholic Education into the formal school curriculum. Besides, in order to promote positive Catholic values amongst students, they are

encouraged to participate in different community services such as serving the underprivileged families and joining the 'Together We Care' event. It is also hoped that students' spirituality will be fostered through various regular religious practices and activities, including morning prayers, prayer meetings, Bible study competitions, religious assemblies and visits to the home for the elderly.

Procession of Our Lady

Religious education

Positive Attitudes and Values

Through a wide range of activities, our school aims at guiding students in their exploration of their strengths, unleashing their potential, cultivating students' gratitude and enhancing their resilience so that

they can embrace challenges with grit and appreciate their own talents. Hence, they are able to develop positive attitudes and values to confront difficulties with hope.

Diversified Learning Activities

Our school provides more than 50 extra-curricular activities covering academic, interest, sports, art and religious areas in order to give our students the most comprehensive and the richest learning experience. We aim to extend classroom learning and let students have a balanced development on ability, knowledge, values and attitude so as to realize our

objective in education, i.e. education on spiritual, moral, intellectual, physical, social and aesthetic aspects. With a wide range of extra-curricular activities, students are able to grow and develop individual potential. Besides, students are strongly encouraged to take part in various social services, joint school activities and inter-school competitions.

Charity sales - Fundraising with flowers

Charity sales - Fundraising with lucky bags

Social Service

Upholding the five core values of Catholic Education, our school emphasizes and cultivates the spirit of love among students to the society. Students are encouraged to participate in diverse community services,

such as home visits to the elderly, charity sales and flag days. Throughout the activities, students are given an opportunity to realize that the underprivileged minority groups need more love and care from the society.

Home - School Cooperation

Different events like parents' talk, annual dinner and DIY activities are held by the Parent Teacher Association (PTA) every year. It forms a network between parents and teachers to facilitate the growth of the students in line with the School Mission. In order to promote the cooperation between parents and the school, Parents' Day is organized every year to invite parents to

meet with class teachers and learn about the performance of their children at school. Furthermore, class teachers maintain close contact with parents and collect their opinions about the school. Undeniably, the PTA serves as an important platform to provide two-way communication between the school and the parents.
